

A GUIDE OF PLANTING TYPES

THE CITY OF TROY, OHIO

A GUIDE OF PLANTING TYPES THE CITY OF TROY, OHIO

A Guide of Planting Types, (“Guide”) is designed to inform contractors, business owners, citizens, and all people who work and enjoy recreation in the City of Troy, of the particular type of landscaping material the City of Troy prohibits being planted in commercial and industrial parking lots. Thought should be given as to the selection of plant material which will survive harsh conditions such as strong winds, extreme heat, freezing temperatures, and roadway de-icer.

While not individually listed, the Guide also prohibits the planting of vegetation as listed in the City of Troy Codified Ordinance, Section 521.11 – Noxious Weeds.

Other vegetation that will be prohibited, are those items with undesirable characteristics such as weak wood, undesirable fruit, thorns, susceptibility to disease, etc. Each proposed landscape plan will be reviewed on a case by case basis.

Should a landscape material which is prohibited in this Guide be chosen for areas other than parking lots, the setback of that particular material, from a parking lot or area, will need to be the distance of the canopy of the material at maturity, plus 10 feet.

Questions concerning information in this Guide may be directed to the City of Troy Development Department.

PROHIBITED LANDSCAPE MATERIAL	
<i>Acer nugundo</i>	Box Elder
<i>Acer saccharinum</i>	Silver Maple
<i>Aesculus sp.</i>	Buckeye, Horsechestnut
